### **DETAILED ACTION**

This action is the first action relating to serial application number 10/670,271 filed 09-26-2003. Claims 1-10 are allowed.

#### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

#### ***Drawings***

2. The examiner has accepted the drawing filed with this application as formal drawing.

#### ***Allowable Subject Matter***

3. The following is an examiner's statement of reasons for allowance: the prior art fails to anticipate or render obvious the combination of a hydraulic control apparatus for a cvt as set forth in claim 1, and most significantly requires a first oil passage for supplying an oil pressure regulated by the pressure regulative valve, a second oil passage for supplying the oil pressure regulated to a primary pulley cylinder chamber of the CVT and draining the oil pressure therefrom, a third oil passage for draining the oil pressure within the cylinder chamber, and a fourth oil passage downstream of the pressure regulative valve. The third and fourth oil passages are connected to supply an oil pressure to the cylinder chamber and establish a minimum oil pressure required for clamping the belt depending on reduction of the oil pressure within the cylinder chamber.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sato (5,113,718), Murakami et al. (6,508,741), Imai et al. (6,612,958), Yamamoto et al. (6,641,261) Sugaya et al. (4,551,119) and Iino et al. (4,944,201) disclose a cvt comprising a hydraulic system and plurality of oil passages but fail to disclose the invention as claimed.
